

**SUPPLEMENTAL LABELING
FOR DISTRIBUTION AND USE ONLY WITHIN IDAHO**

Crompton
Unifroyal Chemical

Comite®

**AGRICULTURAL MITICIDE
FOR POTATOES**

EPA REG. NO. 400-104 EPA SLN. NO. ID-040010

COMPOSITION

Active Ingredients: (% by weight)
Propargite (Sulfurous acid, 2-[4-(1,1-dimethyl-ethyl)
phenoxy] cyclohexyl-2- propynyl ester) * 73.6%
Inert Ingredients 26.4%
Total: 100.0%

*Contains 6.55 lbs. active ingredient per gallon

**KEEP OUT OF REACH OF CHILDREN
DANGER**

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
Do not apply this product through any type of irrigation system.

**POTATO
DOSAGE INSTRUCTIONS**

MITES CONTROLLED	TIMING OF APPLICATION	AMOUNT OF COMITE PER ACRE	GALLONS OF SPRAY SOLUTION PER ACRE		TOTAL NUMBER OF SPRAYS PER YEAR	MINIMUM SPRAY INTERVAL (DAYS)	EARLIEST HARVEST DAYS AFTER APPLICATION
			Ground Application	Aerial Application			
two-spotted spider		2 to 2½ pints*	20 to 50	minimum of 10	2	14	14

* The 2½ pints per acre rate should be used when the crop is under extreme mite pressure.

RESTRICTIONS/PRECAUTIONS

- This pesticide is toxic to fish. Comite should not be used under this SLN label where impact on listed threatened or endangered species is likely. Consult the federal label for additional restrictions and precautions to protect aquatic organisms.

SPRAY DRIFT PRECAUTIONS

AVOIDING SPRAY DRIFT IS THE RESPONSIBILITY OF THE APPLICATOR. OBSERVE THE FOLLOWING PRECAUTIONS WHEN SPRAYING IN THE VICINITY OF AQUATIC AREAS:

Do not apply by ground within 50 feet or by air within 75 feet of lakes, reservoirs, rivers, permanent streams, marshes or natural ponds; estuaries and commercial fish farm ponds.

The above excludes irrigation canals and wasteways as well as man-made irrigation conveyance structures and impoundments.

These buffers are in effect only when the cited bodies of water are down wind from the area being treated. When the air is moving away from the water, commence applications on the side nearest the water and then proceed away from that water.

(continued on back)

Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

This label must be in the possession of the user at the time of the pesticide application.

EPA SLN. NO. ID- 040010

Make aerial or ground applications when the wind velocity favors on-target product deposition, approximately 3 to 10 mph when measured by an anemometer outside the area to be treated (or orchard, vineyard, or field to be treated) on the upwind side. For ground and aerial applications apply the coarsest droplet size spectrum that provides sufficient coverage and mite control.

For aerial applications, apply from the lowest possible height that provides good pest control and flight safety. Use the shortest boom length that is practical.

For ground applications use the lowest nozzle height that provides uniform coverage.

Risk of exposure to sensitive aquatic areas can be reduced by making applications when the wind direction is away from the aquatic area.

Where possible, avoid spraying during temperature inversions, as drift potential is high during these periods.

RUNOFF PRECAUTIONS

Under some conditions, propargite may have a high potential for runoff into surface water for several days after application. To prevent off-site movement due to runoff, avoid applications to the following areas:

- frequently flooded areas (excluding crop irrigation areas).
- areas where intense or sustained rainfall is forecasted to occur within 48 hours.

Care should be taken when making applications where the following conditions exist:

- poorly draining or wet soils with readily visible slopes toward adjacent surface water.
- areas with in-field canals or ditches that drain to surface water.
- areas not separated from adjacent surface waters with vegetated filter.

Consult your soil conservation service for recommendations in your use area.

Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

This label must be in the possession of the user at the time of the pesticide application.
